Summary	The Central Java administration has urged residents to remain vigilant against hydrometeorological				
	disasters as the province will likely continue to see moderate to heavy rainfall until next month. The				
	region has already faced devastating disasters triggered by extreme weather in the past month, including				
	29 floods and seven landslides.				
	- According to the Central Java Disaster Mitigation Agency (BPBD), the series of disasters				
	affected 15 out of 35 regencies in the province, claiming at least 27 lives and impacting				
	thousands of residents. Six villages	thousands of residents. Six villages in Kudus regency remain submerged under flood-waters			
	ranging from 20 to 60 centimeters	ranging from 20 to 60 centimeters deep since last week, severely disrupting resident's daily			
	activities.				
	- Extreme weather that struck the reg	- Extreme weather that struck the regency on Wednesday also triggered multiple landslides and			
	knocked down several trees, caus ing damage to residential areas. Flooding has also affected				
	railway tracks in Grobogan regency since last week, forcing state owned railway company, PT				
	Kereta Api Indonesia (KAI), to cancel or reroute dozens of train services.				
	- Acting Central Java governor Nana Sudjana announced that authorities have implemented				
	several weather modification efforts over the past month and plan to continue these measures				
	in the near future.
